[Phase2: In Person Design Workshop in Tokyo]
November 12 (Sun) - 16 (Thu)

Japan Landscape Architects Union (JLAU)
IFLA-APR 2023 Japan Conference Organizing Committee

Envision Landscape Infrastructure to create Future Setagaya Lifestyle

Setagaya-ward is known as residential city, located at south-west of Tokyo 23 wards where 940,000 people reside. Natural Infrastructure with Green and Water such as Tama River, Kokubunji Cliff Line, Kitazawa River, Karasuyama River, Jyakuzure River and Open Spaces in various scale exist throughout the city. Three Railway Infrastructure such as Keio Line, Odakyu Line, and Tokyu Line extend from East to West, and small cities stand in a row along railways. Road structures consist of two major roads Circular Route 7 and 8, Setagaya Road and countless narrow streets. Even though Setagaya is the city that is easy to live in, serious social problems such as Disasters caused by climate change, divided access between South and North areas, high aging rate and welfare, aging public facilities accumulate as big issues.

This International Student Design Workshop aims to 'Envision Landscape Infrastructure to create Future Setagaya Lifestyle'. Workshop participants are first exposed to the opportunities to learn about existing rich natural infrastructure that Setagaya has conserved as well as social infrastructure and various green communities which are very unique. In this study we will find out how we can create future lifestyle by implementing

Management: the landscape infrastructure.

Team organization: 48 students total (6 students x 8 teams) will be selected from the applicant in IFLA APR countries.

Tutor system: Professional tutors in Landscape Architecture and adjacent fields will support each team.

Purpose: 'Living with Disasters' is the main concept for the IFLA APR 2023 Japan Conference that includes three frameworks, 'Green Infrastructure', 'Well Being' and 'Landscape Culture'. All Landscape Architects in Asia Pacific Region will gather and share their social problems in each region, and expect to discuss how to challenge those issues towards sustainable future. International Student Design Workshop is organized to offer opportunities for young generations in Asia Pacific Region to work together from research till design planning in Setagaya, Tokyo helped by the tutors with diverse background. The purpose of this Workshop is to create platform for International Students in Asia Pacific Region to collaborate, challenge design problems, and most importantly exchange their diverse cultural and social background. The results of this International Workshop will be shared with City of Setagaya. Students are required to discuss how their ideas can be implemented.

Eligibility: Undergraduate and Graduate Students in Landscape Architecture or adjacent fields. An applicant country required to be IFLA APR members.

Admission: Total of 48 students. If applicants exceed capacity, International Student Design Workshop committee will conduct selection based on application materials.

Application Conditions:

- Student who can participate all workshop program from online workshop to face to face workshop in Tokyo.
- Workshop will be conducted in English, and basic English communication skill recommended.
- All Workshop participants will work on editing booklet after the Workshop
